

WINTER GREEN

Green may be the last thing you think about in winter. Lots of plants and trees lose their green leaves... but some stay green all year! These plants are called 'evergreens'. Let's go outside and see how many different winter greens we can find!

Holly

Rhododendron

Live Oak

how many?

Broadleaf

Pine

Conifers

how many?

Spruce

Cedar

Don't Forget To Look Down!

Some moss and clubmoss—like Ground Pine—stay green year round.

Ground Pine

Moss
