

PATIENCE PAD

"It's called *fishing*, not *catching*." Fishing takes patience. While waiting for fish to bite, take the opportunity to observe the world around you. Birds, bugs, frogs, plants, and more are waiting for you to discover.

Find something interesting and draw it while you wait.

FRIEND TO FISHES

Part of being a great angler is caring for fish and the environments they live in. Like people, fish need clean water, plenty of food, and safe shelter to survive. Here are some ways you can be a good friend to fish.

☐ Pack it in, Pack it out

Don't leave trash. Keep the water clean and take anything you bring.

☐ Be Gentle

If you catch and release, be gentle and cause as little injury to the fish as you can.

☐ Take only what you need

Just because the bag limit is 5 doesn't mean you have to take 5. Catch only what you need and leave the rest for others.

GONE FISHIN'

WITH TRACK & KIP

Fishing is a great way to explore nature. It requires observation, patience, and skill. TRACK and KIP made this guide to help you become a better angler and catch some of the common fish here.

CATFISH

Catfish (Family *Ictaluridae*) are freshwater fish that include channel catfish and blue catfish. They feed along the bottom of clean water using taste buds on their skin to detect food. Their diet includes plant matter, crayfish, mollusks, fish, dead animals, and other things they find.

Angler Tips Catching catfish is a lot easier if you use your knowledge of their behavior and follow these tips:

- Try dough balls and “stink baits”.
- Cast near banks, logs, and murky spots.
- Let the bait rest on the bottom.

REGULATIONS

Find and note current species regulations at:
<https://www.dnr.sc.gov/fish/beginners.html>

In Season: YES or NO

Bag Limit:

Minimum Size:

 inches

BLUEGILL

Bluegill (*Lepomis macrochirus*) are freshwater fish that thrive in calm waters with lots of places to hide like submerged logs or plants. They are most active in the morning and evening hours, hunting in shallow, weedy water. They prey on insects, snails, and small crustaceans.

Angler Tips Catching bluegill is a lot easier if you use your knowledge of their behavior and follow these tips:

- Try worms or crickets as bait.
- Cast in calm, shallow water near vegetation.
- Set a bobber 6-12” above hook.

REGULATIONS

Find and note current species regulations at:
<https://www.dnr.sc.gov/fish/beginners.html>

In Season: YES or NO

Bag Limit:

Minimum Size:

 inches

CRAPPIE

Crappie (*Pomoxis sp.*) are freshwater fish that live in quiet lakes and slow rivers, often near sunken trees or brush. These easily spooked fish feed mostly at dawn and dusk, hunting in schools. Their diet includes small fish, insects, and crustaceans.

Angler Tips Catching crappie is a lot easier if you use your knowledge of their behavior and follow these tips:

- Try small plastic grubs or crappie jigs.
- Cast near banks, logs, and submerged brush.
- Slowly and continuously reel in your line.

REGULATIONS
