

Flower Power

Nature's Color Palette

Certain colors attract certain kinds of pollinators.
How many colors of flowers can you find?

Flowers have lots of cool powers - they can grow in many places, attract pollinators, and even turn into seeds! See how many different wildflowers you can find on your next hike. Try the following activities to make your search for spring blooms even more fun!

Parts of a Flower

Flowers come in many different shapes and sizes, but they all have the same basic parts. Look closely at a flower and see how many of its parts you can find.

What flower color are you attracted to? _____
