Meet a Tree

Look at all the types of trees! They have different shapes, sizes, and leaves. And all trees need certain things to help them grow. Use this brochure to learn about trees.

Food for Trees

Trees need food and energy to grow, just like people do. Read how the trees get their nutrients.

Each **LEAF** can make food for the tree using light from the **SUN**.

RAIN provides water for the tree to drink.

A tree **ROOT** absorbs nutrients it needs from the **SOIL**.

The tree's food and water travels up and down the **TRUNK** and through each **BRANCH** to feed the whole tree.

Unscramble the words above to reveal the parts of the tree and its food sources.
